GAZETTEER OF INDIA
UTTAR PRADESH
DISTRICT SITAPUR
SUPPLEMENTARY

PREFACE

By its very nature a supplementary is not something new but rather an adjunct or continuation of the parent volume. Supplements were issued from time to time to the Gazetteer volumes published in the old series. The object of issuing such supplementaries to the District Gazetteers is to update the statistical data contained in the parent volume.

The revised edition of the Sitapur District Gazetteer was published in 1964 by the Gazetteers Department. The present volume is intended to supplement the information contained in the revised edition by more recent statistics. Every attempt has been made to bring the statistical data as up-to-date as possible.

My thanks are due to Sri Rudra Shekhar Misra, Editor and Sarvsri Sunder Lal and Chandra Prabhakar Sharma, Team Leaders among the Compilation Officers of whom Sri Sunder Lal has since retired, for their valuable assistance in this work. I am also thankful to the other staff members of the office for their association in the preparation of this volume.

I will be failing in my duty if I do not express my thanks to Dr. P. N. Chopra, M.A., Ph.D., Editor (retd.), Central Gazetteers Unit, Ministry of Education, Government of India, New Delhi, as also the editorial staff of the Unit for their effective role in the planning and co-ordinating the work of preparation of the supplementaries. The Unit scrutinised the Tables of this Supplementary with great care and made several helpful suggestions.

The information and statistical data contained in the Supplement is based on the Census publications for the years 1961 and 1971 and the various official records maintained at the office of the collector and district magistrate and the district offices of numerous departments of the Central and State governments to whom my sincere thanks are due.

MEDICAL FACILITIES

There were 49 allopathic institutions in 1979 comprising primary health centres, hospitals and dispensaries in the district, where outdoor and indoor treatment is provided. A total no. of 1,465 beds are available.

The medical facilities have been extended extensively in the rural areas by the establishment of health centres. There are 20 primary health centres in the district. The following Statement gives the list of primary health centres in the district :

Administrative Set-up

In July 1973, the departments of medical and public health were again reorganised, abolishing the posts of the civil surgeon and the district medical officer of health. Under the new set-up, a chief medical officer has been appointed, who heads the entire medical, public health and family planning set-up in the district. The three deputy chief medical officers supervise all district level hospitals, employees state insurance scheme, maternity and child welfare, family welfare and nutrition programmes, dispensaries, infectious diseases hospitals, school health dispensaries and primary health centres. The district has been divided into 3 regions for medical and public health purposes. Each region is administered by one deputy chief medical officer since 1977. He is assisted by a team of doctors, compounders, nurses, etc., posted in different medical institutions. Only three hospitals in the district out of 49 allopathic institutions are run by private bodies. However three institutions i.e. Eye Hospital, Sitapur, Eye Hospital, Khairabad and Neri Hospital accounted for 883 beds in 1979 (of the total no. of beds-1,465).

In the year 1977-78, the community health scheme was introduced in the rural areas of the district. A community health visitor has been appointed for each 1,000 of the population. The visitor is trained to render first aid and preliminary treatment. He carries a medical kit, containing medicines, bandages, etc. The visitor also reports about the incidence of epidemics, if any, to the respective primary health centre.

Sanitation and Public Health

The chief medical officer exercises control and supervision over all health programmes, primary health centres and rural dispensaries. Besides, he is also responsible for the collection of intelligence about epidemics, checking of food and drug adulteration and also for providing necessary assistance during the floods and the outbreak of an epidemic. For his assistance there are three deputy chief medical officers and an assistant medical officer at the district headquarters and one to two medical officers in each primary health centre.

For public health and sanitation work every local body has its own team of sanitary inspectors and vaccinators. Besides, each Gaon Sabha is responsible for village sanitation. The service of sanitary inspectors is also available to the Gaon Sabhas for technical help and guidance. The *pradhans* (village headmen) report outbreaks of epidemics to the primary health centres for initiating preventive and curative measures.

Family Planning And Child Welfare

The chief Medical officer and the three deputy chief medical officers exercise complete supervision over the maternity and child welfare family planning and nutrition programmes. A team of medical officers, midwives and *dais* (untrained midwives), extension educators and health visitors are posted at each of the primary health centres.

First attempts of family planning were made in the closing years of the fifties, with the sole objective to arrest the growth of population and ensure good health of mothers and children.

The concept of a small family is being publicised through films, placards, posters and personal contact. The family planning schemes are implemented through the family welfare centres attached to each primary health centre. There are 20 family welfare centres in the district and each centre supervises the work of 3 family welfare sub-centres.

The following statement gives in detail the various measures undertaken in order to implement the family planning schemes :

ERADICATION OF MALARIA

The eradication of malaria was initiated in 1959, with the spraying of D. D. T. over all such regions where breeding of insects and mosquitoes was visualised. It is called 'attack phase'. The spraying of D. D. T., was followed by the 'maintenance phase' and the 'surveillance phase'. The two phases involved the detection of malaria cases by collecting blood smears from all over the district and spraying of D. D. T., in areas where malaria was in vogue. Persons suffering from malaria are given radical treatment.

The chief medical officer assisted by two assistant malaria maintenance officers, health inspectors, and basic health workers, looks after the work. The basic health workers carry out domiciliary visits to all villages from the primary health centres where they are posted. They collect blood smears and provide radical treatment to patients.

The following statement gives the incidence of malaria in the district :

Table IV

Filaria

A filaria survey team was posted at Sitapur in March, 1979 which comprised a filaria survey officer, a filaria inspector, two laboratory technicians, two field workers and two others. In a survey conducted in 1979-80 it was found that out of 9,039 cases examined, only 144 were found positive for micro-filaria, 105 for the disease and 2 for both (micro-filaria and filaria). All positive cases were treated.

Eradication Of Smallpox

The national smallpox eradication programme was launched in district Sitapur in the year 1964-65. The main objective was successful coverage of the entire population of the district by preliminary vaccinations and re-vaccinations.

At present the chief medical officer is in charge of the scheme and is assisted by 3 deputy chief medical officers and a team of sanitary inspectors and vaccinators. The local bodies have their own vaccinators.

The following statement gives the number of persons vaccinated in the district from 1964 to 1979 :

PROHIBITION

The government launched the prohibition scheme in the State and many districts were declared 'dry' areas. In this district prohibition was imposed on April 1, 1979.

The government later revised its policy regarding prohibition and it was lifted in most of the districts. Though the district ceased to be 'dry' area since September 1, 1980 but the efforts of the social workers have continued to make the people conscious of the evils attached with the use of liquor and other intoxicants through documentary film shows, exhibition of posters and placards, cinema slides, nautankis, puppet shows, etc.

CHAPTER XVIII

PUBLIC LIFE AND VOLUNTARY SOCIAL SERVICE ORGANISATIONS

Vidhan Sabha (Legislative Assembly)

The system of double-member constituencies was abolished in the 1962 general elections. The newly formed constituencies were those of Misrikh, Sitapur, Laharpur, Tambaur, Biswan, Mahmudabad, Bari, Khairabad and Machrehta, Tambaur, Bari and Machrehta constituencies were reserved for the Scheduled Castes candidates. The results of this election were as under :

Table I (a)
